S.S. WHITE

QUALITY LINE THREADED ABS PLASTIC PROTECTORS

...the ultimate in impact resistance

S. S. White threaded ABS protectors provide outstanding resistance to damaging blows during shipping, storage, manufacturing. They are impervious to oils, greases, alkalies and other common corrodents . . . cleanly threaded for positive sealing of fluids or protection against dirt, dust, contaminants. They remove quickly by hand and leave no shreds. Here is the *best protection possible* for your threaded products. Complete range of plugs and caps to fit male and female machine screws, pipe threads, spark plug and propeller shaft threads.

SOLD IN EVEN 100 PIECE LOTS PER SIZE

Here is an example of the outstanding impact resistance of S. S. White rigid ABS protectors. We fitted an S. S. White Quality Line plastic protector to the test piece (a spike with one end threaded) in the photo. Then we drove the spike through a four-by-four by hammering on the rigid ABS protector! We found that, despite the terrific pounding, both the protector and the delicate threads that it was designed to protect came through undamaged!

S.S. WHITE

WRITE FOR ASSORTED QUANTITY DISCOUNTS ON THIS GP LINE

GENERAL PURPOSE PLASTIC PROTECTORS

The S. S. White General Purpose "GP" line protects all threaded and nonthreaded parts in a range from 1/4" to 4" with an accurate, engineered fit. They eliminate special sizes and reduce inventory.

Here is the ideal low-cost way to protect your products during shipping, storage, or manufacturing. Each GP protector can be applied to machine screw threads, both male and female . . . pipe threads, both male and female . . . and tubing, both ID and OD, as a cap or a plug.

The S. S. White GP plastic protectors are made of two types of polyethylene. Both afford tough, low-cost protection of valuable equipment. Polyethylene is resistant to acids, alkalis, caustics, petroleum-based products, and most common solvents.

Molded-in "seal rings," (buttress threads on ID of protector) provide extra-secure retention and sealing capacity. Best of all, GP protectors are low in cost.

TWO FORMULATIONS AVAILABLE:

GP LOW DENSITY POLYETHYLENE — "GP-L"

- excellent temperature stability from -95 to 175F
- chemical resistance to wide range of corrosives
- will not affect cadmium or other platings
- tough and abrasion-resistant
- high dimensional stability
- standard color — RED

GP ELASTIC POLYETHYLENE — "GP-P"

- all the features above PLUS flexibility of vinyl!
- standard color — YELLOW

TERMS: Net 30 days

SHIPMENTS: F.O.B. Prince Bay, Staten Island, N.Y.

NOTE: MINIMUM BILLING
\$10.00 PER ORDER

MATERIAL: to specify material indicate
part number as GP or GP-L

*Prices effective September 1, 1965 and are
subject to change without notice.*

S.S. WHITE

FLEXIBLE VINYL ROUND CAPS

PLASTIC PROTECTORS

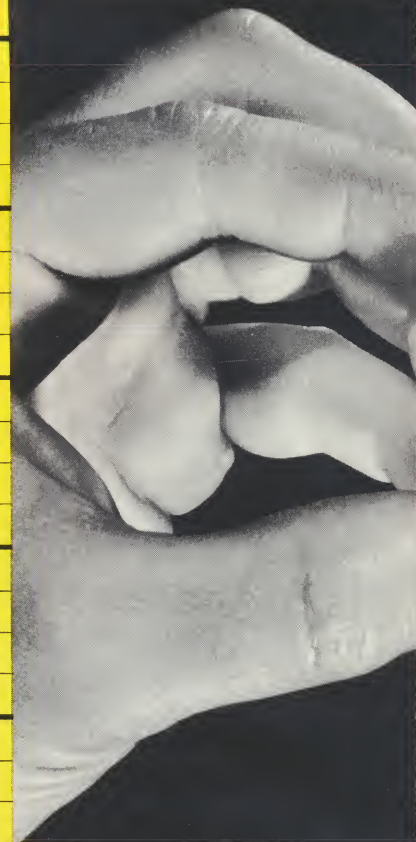

...low cost protection for tubing, machine, and screw threads

Flexible, non-shredding, easily applied and removed caps for protection of both threaded and nonthreaded parts. They are made of a special grade of flexible vinyl which has a non-waxy, "non-slip grip" surface, greatly facilitating removal by the end user. Their rubber-like composition provides an effective cushion against hard blows.

S.S. WHITE

STANDARD POLYETHYLENE PLASTIC PROTECTORS

threaded plugs and caps

The S. S. White standard polyethylene thread protectors are inexpensive, tough and durable, designed to withstand wear, abrasion and rough usage. They won't chip or break and are vermin and fungus proof. They are unaffected by most solvents, caustics, acids and petroleum-based products. They can be used in a -95°F to 175°F temperature range. These caps and plugs are the ideal, low-cost way to protect parts during shipping, storage and processing.

BEVEL SEAT PLUGS

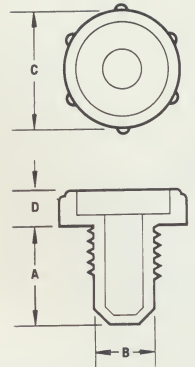

for Machine Screw Threads

Designed to fit NS and NF Class 1-2-3 Standard Threads.

Go Gage only. Especially suitable for AN, SAE and JIC tube fittings, particularly flared fittings and bosses. Plugs are ribbed for easy handling. These plugs stay put with easy finger tightening.

COLOR: High visibility yellow to aircraft spec. 505-ANA Bul. 166.

MATERIAL: Standard Polyethylene.

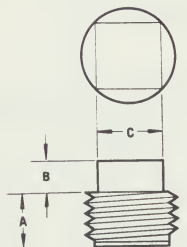

SQUARE HEAD PLUGS

for Pipe Threads

Designed to fit NPT Standard Pipe Threads. Go Gage only. The square head design is adaptable to either hand or machine tightening.

COLOR: High visibility yellow to aircraft spec. 505-ANA Bul. 166.

MATERIAL: Standard Polyethylene.

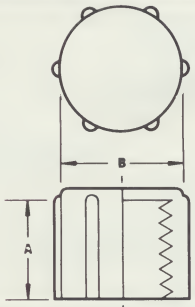

RIBBED CAPS

for Machine Screw Threads

These caps will fit NS and NF Class 1-2-3 standard threads. Go Gage only. Ribbing simplifies application and removal.

COLOR: High visibility yellow to aircraft spec. 505-ANA Bul. 166.

MATERIAL: Standard Polyethylene.

for
protection
of electronic
pin
connectors

The S. S. White rectangular caps are tough, impact-absorbing plastic protectors designed to fit standard miniature rectangular electronic pin connectors. Rectangular caps prevent damage to these vulnerable and highly important parts during assembly, shipping, storage, and on-site installation of the electronic component.

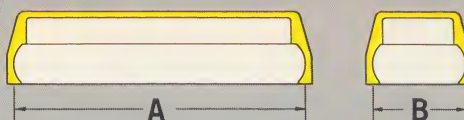

They seal out damaging moisture, dirt, and other contaminants. When pins are left exposed, either dangerous shock to personnel or damaging electrical shorts are always possible. Remedy: for complete insulation, cover exposed pins with S. S. White rectangular caps. Their bright yellow color meets Aircraft Spec 505 and ANA Bulletin 166 and helps identify the pin connector locations. They speed installation too: just slip on a rectangular cap and immediately the connector is easier to grip and install.

The S. S. White rectangular caps are made of a special grade of elastic vinyl that has a rubber-like surface and molded-in ribbed sides for easy gripping and fast removal. Moderate flexibility of material allows cap to fit connectors mounted in aluminum hoods, receptacle shells, potting forms and other similar applications.

S. S. WHITE

SPECIAL PLASTIC PROTECTORS

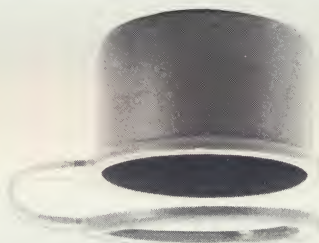

Over the years that S. S. White has been the leader in plastic protection, we have custom-molded many "special" plastic protectors to perform unusual tasks.

A few of these are shown on this page.

S. S. White is ready to help *you* in solving those unusual protection problems. Our know-how and capacity is as near as your telephone. Why not call today?

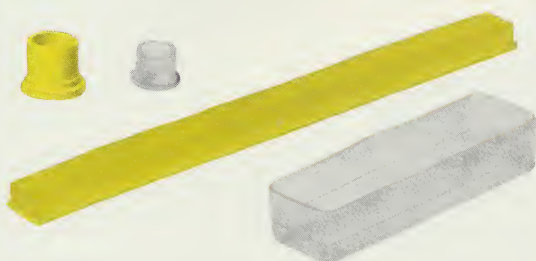

CHROME PLATED CAPS
*for metallic finish,
extra resistance.*

CAP
with molded-in retaining collar

CAP WITH CHAIN
for captive protector

ELECTRICAL CONNECTOR CAPS
to fit special sizes

COUPLING NUT
*for low cost
connections*

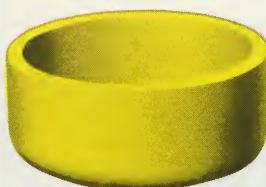

WIDE FLANGED CAP

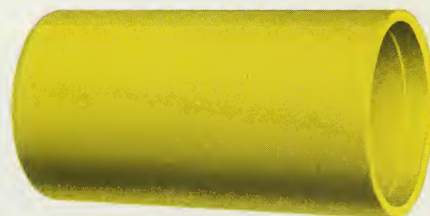

CAP
with knurled sides

PLUG
*with inside
shoulder
to accept
"O"-ring*

SHALLOW CAP

DEEP CAP

NEW

MS90376 ELECTRICAL CONNECTOR CAPS FOR MIL-C-5015 and MIL-C-26482 CONNECTORS

NEW ELECTRICAL CONNECTOR CAPS meet MS90376 (Navy). S. S. White's new F.C. series protectors make available for the first time a protector meeting military specifications. All standard sizes available. Made from tough, flexible polyethylene MIL-P-3803, with red and yellow colors to MIL-STD-104.

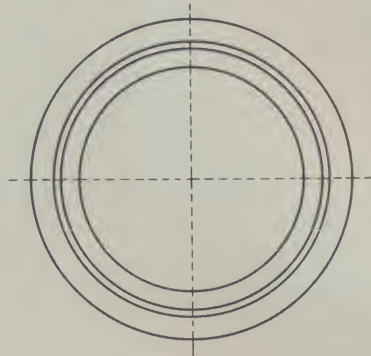

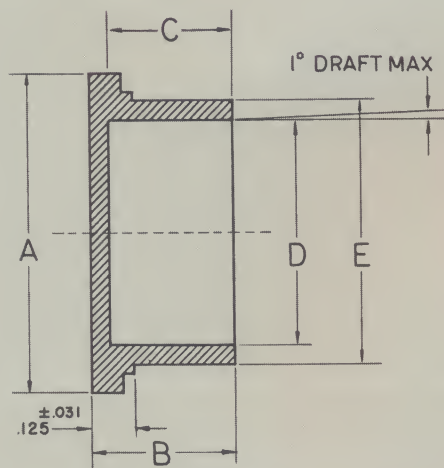

Protectors provide tight seal eliminating dirt, moisture, during manufacture, shipment, storage. Eliminates shock hazard during assembly of components and during testing. This new line is complete for all standard connectors. Polyethylene protectors are inexpensive, readily available from S. S. White's large manufacturing capacity.
